WHAT CAN YOU EXPECT FROM OUR COURSE?

Two free full-fledged training webinars, where:

In just two free webinars, we will teach you how to create your own website on WordPress.

We will show you how to properly optimize your site and make it attractive to search engines. Only fresh, professional, and up-to-date information!

You will learn what "good indexing," "high traffic," "stable visitor growth," and "top search rankings" mean, and, more importantly, how to achieve all these metrics!

WHAT EXACTLY IS OPTIMIZATION AND WHY DO WE NEED IT?

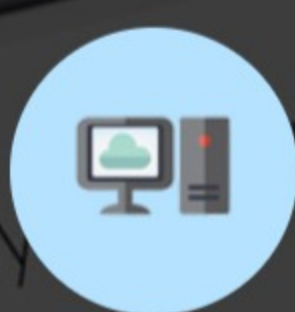

On the vast expanse of the internet, there are countless active and even abandoned websites. Most of them overlap not only in categories but also in content.

Imagine thousands of websites providing the same information or selling the same service in one way or another. You can only find these sites through specific search queries on search engines.

But what do you do if your site looks like a hundred or thousand others, and there are only 10 positions on the first page of Google or Yandex? How do you bring visitors to your resource's page? This is precisely why optimization is needed – to get your site on the first page of search results!

We will teach you how to make your site attractive to search engines and advise you on how to get it to the top pages, surpassing all competitors.

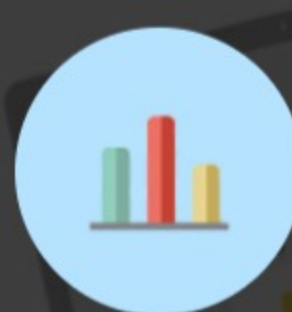

BY THE END OF THE TRAINING, YOU WILL BE ABLE TO!

Create your own website or blog
